Description of product

The product "Aluminum flange bar with roller, type VIGADUR" is designed and used as temporary anchor point on steel profile. It consists of the bar of diameter of 32 mm on which two adjustable claws with rotary rollers are placed. The claws are adjustable at intervals from 76 mm to 255 mm. Attachment point (the eye) is connected with the bar by metal clamp. The bar and the adjustable claws with rotary rollers are made of aluminium alloy and the eye is made of steel.
